Dear members of the Loudoun County Board of Supervisors,

As you consider the current issues facing the community regarding proposed power lines, on behalf of the thousands of Loudoun County residence who call Leesburg Pike Community Church a place of worship and source of help, we ask that the Board of Supervisors take action to protect the County, organizations, and all County residents, who will be negatively affected by these power lines and substations. Leesburg Pike Community Church is one such organization that will be negatively impacted by the proposed Aspen to Golden transmission lines. As we have made attempts to convey to Dominion directly, the proposed 'ungrounded' lines would be a significant encroachment upon the current and future use for our church and the various ministries upon which the many families and local nonprofits of Loudoun County rely. We hope and pray that you will take an active role in every legal and administrative process available to the Board of Supervisors to make sure that the many voices opposed to and negatively impacted by this encroachment are heard and that the County's interests are protected.

Please act with resolve to protect the scenic, historical, and environmental assets that make Loudoun a desirable place to live, work, worship, and play.

Respectfully,

Dr. Charles David Whitlow  
Lead Pastor
